

## ***Music for Incandescent Events; Sunset***

Installation for light sensors and audio

### **Technical needs**

#### **Artists provide the following:**

light sensors and apparatus connecting to MP3 players  
weatherproof box if needed

#### **Venue provides the following:**

##### **[for outdoor exhibit]**

one electrical outlet for electronics, plus whatever is required for amplifier(s)  
outdoor grade electrical cable

2 amplified loud speakers suitable for outdoor use  
minimum 2 loudspeakers, 4 or 8 small loudspeakers possible, as this installation can be experienced intimately by 2 persons, or by a group, depending on setting and venue resources

subwoofer optional but preferred  
ample audio cable; Unbalanced, with 1/4-inch phone plugs.

a space where the view of the sky is unobstructed in which to place the light sensors  
(this could either be close to or removed from the location of the loudspeakers)

note: loud speakers must remain set up throughout entire exhibit, regardless of weather

##### **[for indoor exhibit]**

one electrical outlet for electronics, plus whatever is required for amplifier(s)  
amplifier  
electrical cables as required

2 powered loud speakers or passive loudspeakers  
minimum 2 loudspeakers, 4 or 8 small loudspeakers possible, as this installation can be experienced intimately by 2 persons, or by a group, depending on setting and venue resources

subwoofer optional but preferred  
ample audio cable; unbalanced, with 1/4-inch phone plugs.  
In the case of passive loudspeakers, ample audio cable to amplifier

a space where the view of the sky is unobstructed in which to place the light sensors  
(this could either be close to or removed from the location of the loudspeakers)
